

## **Important Insurance Information for organisers of events**

Any organiser organising any show attendance is asked to use the online notification form.

The Club's insurance is purely a Public Liability policy and is there to protect the Club and its officials & organisers from claims of negligence and mishap arising from their actions in organising an event or from negligent damage caused by any Imp Club owned equipment, such as for example a notice board blowing over, gazebo collapsing, cables or guy ropes creating a tripping hazard or similar such occurrence. The PLI will cover the organiser if non-Club property is involved if the organiser misuses it in good faith (i.e. lays a borrowed extension cable - which has to be electrically safe - near a footpath and someone trips over it). This is why we are requesting that organisers take into consideration the Health and Safety implications.

The Club Public Liability insurance does not cover cars for third party claims, accident, damage, injury, traffic offences and incidents when on the road.

The cars partaking in the run still have to conform to the current Road Traffic Act - thus they must be properly insured, taxed if applicable, and be roadworthy.

Cars on static displays are covered by the PLI for any damage caused by the Club's equipment and any negligence on the part of the organisers in creating/running the stand/event. Any other damage remains the responsibility of the car owner or the person causing the damage. The Club recommends all owners suitably insure their cars
